ENHANCED SOLUTIONS, VERSATILITY & PRODUCTIVITY.

SMART. FAST. INTUITIVE.

bizhub C754e/C654e

The bizhub C754e series proudly joins the bizhub family — named 2013 A3 MFP Product Line of the Year by Buyers Laboratory Inc.
INFO-Palette design incorporates greater convenience for every employee. The screen tilts from 23° to 55° for Section 508 compliance. The control panel combines both software and hardware controls for fast, user-friendly operation. Hard keys provide touch-sensitive control, with options to add an external keyboard and a 10-Key Pad for more flexible command input.

Wireless and Bluetooth printing from mobile phones, and printing from or saving to USB flash drives for greater convenience and versatility.

SMARTER WORKFLOW TO HANDLE BUSINESS INFORMATION.

Award-winning INFO-Palette design now incorporates enhanced functionality for a faster, smoother workflow. The bizhub C754e/C654e color MFPs bring you powerful benefits for accessing more sources of information while protecting client, student and patient confidentiality. Communicating more effectively, in more directions – even on the go. Sharing information with greater speed and security. Improving your image quality. Increasing your output while reducing your cost. And helping you protect the environment more effectively. Welcome to the future of business information – where multifunctional productivity rises to meet 21st-century challenges.

INFO-Palette design incorporates greater convenience for every employee. The screen tilts from 23° to 55° for Section 508 compliance. The control panel combines both software and hardware controls for fast, user-friendly operation. Hard keys provide touch-sensitive control, with options to add an external keyboard and a 10-Key Pad for more flexible command input.

The new look and feel of INFO-Palette design.

Why did BL honor Konica Minolta with a special award for control-panel design? It begins with a 9" color screen and intuitive multi-touch functionality – as easy to operate as a tablet PC.

You can drag, drop, pinch in and pinch out, rotate images and more. A quick flick of your finger across the screen brings you to the menu you want. Function screens put both standard and custom settings at your fingertips. Electrostatic keys and sound settings create a familiar “hands-on” touch and feel. A soft 10-key pad can appear in any position to facilitate numerical entry. And icons can be customized to reflect the operations you use most often.

You’ll also have access to downloadable apps – applications linking your bizhub MFP to on-board utilities and web-based software that help you work faster and smarter. A growing array of apps will make your bizhub the portal to future productivity.

*Options required.
EnvisionIT: proven advantages for every application.

Konica Minolta’s EnvisionIT initiative raises the bar for general business as well as legal, educational and healthcare applications – combining intelligent design, enhanced performance and proven reliability in a powerful vision that speeds your output, improves your images and reduces your costs. High-speed bizhub MFP output, seamless integration with Konica Minolta and 3rd-party software, and IT support from our All Covered division – all combine to help you “envision” ways to work faster, smarter and more cost-efficiently.

EnvisionIT Legal solutions help legal departments and law firms manage services and integrate comprehensive solutions for on-ramp scanning to document management systems and more. EnvisionIT solutions for K-12 and Higher Education help cut costs, balance budgets, improve student performance and increase campus-wide and district-wide productivity. EnvisionIT solutions speed the flow of medical information and protect patient records with security features to meet new standards of both the Health Insurance Portability and Accountability Act (HIPAA) and the Health Information Technology for Economic and Clinical Health (HITECH) initiative.

Innovations to reduce costs and help protect the environment.

The bizhub C754e/C654e achieve among the lowest power consumption rates in their class – even lower than the standard specified by Energy Star certification. A unique Eco-indicator enables you to monitor paper, toner and energy usage by device, account or end-user to promote greater cost-consciousness. A Print Preview Driver lets you preview documents before you print, reducing the chance of misprints. Blank Paper Removal saves more paper during printing by eliminating blank pages.

Orange, blue and white LEDs are easier to see for the vision-impaired. There’s even an optional Voice Guidance system to provide audible control instructions.

Our exclusive Simitri® HD toner formulation uses biomass plant-based materials to reduce environmental impact. Our Clean Planet program provides cost-free recycling for all your Konica Minolta consumables. And our Eco Vision 2050 project is committed to reducing CO₂ emissions by 80% over 2005 levels – eliminating greenhouse gases that may contribute to global warming. In fact, Konica Minolta has been named to the Dow Jones Sustainability World Index in recognition of our economic, environmental and social performance.
In high-volume document applications and self-service central reproduction departments (CRDs), bizhub C754e & C654e get the job done faster and better. Fast output speeds handle rising workloads with ease. Standard Dual Scanning gives you an ideal on-ramp for information, including legal, educational and healthcare applications where documents must be converted to electronic records. Powerful finishing options let you produce in-house, on-demand reports, presentations, case files, course content, health information and direct-mail marketing materials. And in every document you print, spectacular high-impact color helps keep you ahead of the competition.

The power of bizhub OP – plus spectacular Simitri HD color.

With bizhub OP (Open Platform) technology, Konica Minolta creates document solutions with an ideal balance of power and simplicity. Fast internal processing with a consistent control interface makes even first-time users more productive. The built-in Emperor® print system gives you immediate PCL6/PS3 emulation and native XPS functionality. Universal printer drivers let you manage printing with standard familiar commands. And bizhub Extended Solution Technology (bEST) provides seamless interface with 3rd-party software for business and professional applications.

Spectacular color quality is an equally essential benefit of the bizhub C754e/C654e. Konica Minolta’s exclusive Simitri® HD polymerized toner creates rich, vivid, high-impact color pages with brilliant full-color photos and graphics. True 1200 dpi print resolution improves half-tone definition and makes text more legible. Built-in PostScript 3 emulation features a more versatile ICC Profile for specialized or detailed color settings. New color conversion imaging and a scanner with enhanced dynamic range reproduce more consistent dark colors and light greens.

For long-running consistency, industry-leading image stabilization technology delivers consistent output, first to final print – and Intelligent Auto Exposure effectively detects and preserves faint thin lines and pale backgrounds. The overall result? Color to rival the quality of output devices costing far more, with simple setup procedures that save time and minimize the need for special training.

High-speed print performance makes you more productive.

Color printing doesn’t compromise your productivity, because the bizhub C754e and C654e are built for speed. Print/copy output up to 60 ppm color, 75 ppm B&W (C754e) and 60 ppm color, 65 ppm B&W (C654e) can handle even late-afternoon peak demands. High-speed scanning at up to 180 originals per minute brings more information into your workflow – and faster warm-up and first-copy times avoid long waits to begin work.

Along with faster output, you’ll have new print functions for greater versatility – wireless and Bluetooth printing from mobile phones, and printing from or saving to flash-memory devices via a convenient USB connector. You can take advantage of cloud services* for off-site storage of documents and programs, including MS SharePoint Server connectivity. MS Office Open XML Support lets you print Office 2007 file formats (docx, xlsx, pptx) via USB and Direct Print.

You can save time with carbon copy printing, outputting the same data continuously from multiple paper trays on different paper types and colors. With “Single Sign-On” and Active Directory Authentication, your bizhub MFP can be accessed without re-entering your password if authentication was performed at the server when your PC was booted. The engine, fusing unit and transfer unit of the bizhub C754e and C654e are designed for long-life reliability – and the accessible paper path makes parts more visible for easier servicing.

COLOR IMAGING TO MAKE COMMUNICATIONS COME ALIVE.

Konica Minolta technology advances the state of the art — with innovations like bizhub OP design, Open API functionality, the exclusive Emperor print system, bEST software integration, and Simitri HD toner with biomass to protect the environment.
Print output in more paper sizes and weights.

Because in-house printing requirements keep changing, the bizhub C754e/C654e can accommodate a wide range of paper sizes and weights — reproducing 11” x 17” originals on oversized sheets to preserve margins and crop marks. For producing human resource packets, legal or educational binders and training or instruction manuals, Tab Printing support lets you print tabbed pages from the multiple bypass tray — even use interleave function to insert tabs within the body of your document.

Four standard paper drawers and manual bypass give you 3,650-sheet capacity. Add the LU-301 Large Capacity Unit, and you can load up to 6,650 sheets for long unattended print/copy runs. Standard 100% duplex productivity at rated engine speed improves productivity to meet tight deadlines. And built-in technology allows you to identify print users, restrict or limit access, and control print/copy costs more effectively.

Modular finishing options for in-house productivity.

With bizhub C754e/C654e, you’ll be able to customize a document solution for every need. The FS-535 Staple Finisher performs 100-sheet 3-position stapling, custom sorting and grouping. It accepts the SD-512 Saddle-Stitch Unit, to produce booklets up to 80 pages (20 sheets) or create center-fold, half-fold and tri-fold documents. It also accepts the PK-521 Punch Kit for 2/3-hole punching at top or side, the ZU-606 Z-Fold Unit, and the PI-505 Post-Inserter to add preprinted covers or chapter dividers.

The compact FS-534 Staple Finisher performs 50-sheet stapling and sorting and supports the PK-520 2/3-Hole Punch Unit. The FS-534 + SD-511 version also supports up to 80-page booklet creation.

Scanning solutions to streamline your workflow.

Along with Standard Dual Scan function that scans both sides of the page in a single pass, the bizhub C754e and bizhub C654e offer an unsurpassed array of scanning features and benefits to bring information into your workflow with greater speed and flexibility.

You can scan directly to Email, FTP, and SMB with simple commands on your bizhub touch-screen panel. User Boxes let you scan and distribute quickly to individuals, departments, workgroups, even projects. Scan-to-PowerPoint converts hard-copy documents to PowerPoint files. Optional LK-110 i-Option License Kit converts hard copy Word and Excel files. Scan-to-Me and Scan-to-Home capabilities add to your convenience and confidentiality. Scanned data can be sent seamlessly to cloud services. TWAIN scanning from PCs provides a smooth interface with legal and other specialized scanning solutions. And with the PageScope Mobile App, you can send scanned data to mobile devices for use on business trips or in the field.

The optional FK-508 and FK-511 Fax Kits can add a high-volume Super G3 fax to your system, with support for up to four fax lines for all-in-one document productivity. A customized Scan/Fax Destination List speeds distribution by filtering your address searches. You can select from a wide range of scan formats, including PDF, compact PDF, PDF/A, Linearized PDF, TIFF, JPEG, XPS (some formats are options). WebDAV support will simplify management of server files and folders.

And using the Distributed Scan function that’s compatible with Windows 7 Servers, you can automate your scanning workflow by sending documents directly to a “Scan Server” set up to follow your instructions. Once again, the advantage is faster, cheaper, more effective document distribution.
SEAMLESS CONTROL
OF OPTIONS, SECURITY, AND SOFTWARE.

With bizhub C754e and C654e, you’ll have multiple options to handle current needs and future opportunities. You can download apps* directly to your bizhub. Select i-Options to expand your productivity. Enhance security to protect your sensitive information. Add industry-leading Fiery color control capabilities for graphics-intensive applications. Take advantage of a full suite of PageScope utilities to manage your documents and devices. And integrate seamlessly with a growing array of Konica Minolta and 3rd-party business software solutions that give you the capability of variable-data mailing, account tracking, cost recovery, and industry-standard programs for healthcare, education, law and other specialized applications.

Apps & i-Options for higher productivity.

The bizhub MarketPlace is your source for downloadable apps that increase the capabilities of bizhub devices, just as mobile service providers and various companies have added apps to serve their customers. You’ll be able to view specialized applications on web-enabled bizhub devices. Scan files directly to Google Mail, Google Drive and SharePoint. Enable bizhub SECURE functions, receive stock quotes, access up-to-the-minute weather reports. Print certificates and paper templates, get corporate messages and more, all on your bizhub control panel at the touch of a button – with more apps coming online on a regular basis.

In addition to downloadable apps, i-Option kits increase the power of your bizhub MFP. LK-101 v3 gives you robust web browser and access to the bizhub MarketPlace as well as 3rd-Party applications. LK-102 v3 combines PDF/A (1a/1b) formatting, linearized PDF and AES 128-bit PDF encryption to handle information stored in User Boxes. You can add LK-104 v3 for Voice Guidance operation, LK-105 v3 to create Searchable PDF files and locate specific text references, and LK-106, LK-107 and LK-108 for Bar Code Font, Unicode Font and OCR Font support. LK-110 lets you create or convert documents to the various Office Open XML file formats you need. And LK-111 provides ThinPrint support – enabling the bizhub C754e/C654e to print in ThinPrint environments without additional hardware.

*Options required.
Optional IC-414 Fiery Image Controller.

For graphics-intensive applications and light production printing needs, there’s a Fiery image controller that helps you manage color printing with professional expertise.

The IC-414 incorporates standard Fiery Command Workstation print job management interface, advanced color matching, color calibration and print queue management, Secure Erase, and Fiery WebTools. Standard Fiery iQE software helps you orchestrate all elements into a professional high-impact result – and you’ll be able to handle specific PANTONE color requirements, manage print queues more effectively, and fine-tune color output to suit the needs of any job.

Fiery Productivity Package includes ImageViewer, Hot Folder printing with embedded job ticket settings, job setup with finishing options and imposition attributes for drag-and-drop printing. An optional Color Profiler Suite allows you to create customized ICC profiles for your device.

Greater IT control with PageScope software.

In addition to the server-based authentication and account tracking capabilities of PageScope Enterprise Suite, the bizhub C754e/C654e include a full array of PageScope software for managing documents and devices. PageScope Web Connection and PageScope Net Care Device Manager enable individual users and IT administrators to manage multiple devices from a single point. PageScope Print Status Notifier provides automatic alerts to speed your workflow. PageScope Data Administrator™ handles addresses, passwords, and accounts with ease – and PageScope Box Operator: download and access scanned User Box data from your PC.

bEST design for seamless 3rd-party software integration.

With INFO-Palette design, the bizhub C754e/C654e represent a breakthrough in MFP value and performance. PageScope software expands the range of bizhub functions. To complete the picture, Konica Minolta’s bizhub Extended Software Technology (bEST) allows seamless integration with software programs from Konica Minolta and 3rd-party developers – software that speeds business workflow, manages print production, performs account tracking and cost-recovery, create direct-mail promotions and more.

Your bizhub can handle a wide range of software for general business as well as specialized legal, educational and healthcare environments. For a complete list, please visit our website: http://kmbs.konicaminolta.us.
